

EPI-USE is a trusted Kronos services partner with global experience in time and attendance advisory, implementation, and consulting services.

We pride ourselves on having a diverse and deeply experienced global team. We provide a wide range of Kronos services from assessment through go live and post go live support. With consultants in over thirty countries, EPI-USE is positioned to support small projects as well as large multi-national projects spanning multiple locations and languages.

Kronos Implementations

Implementing a time and attendance system is more than just installing software – it has to support your entire workforce and add value to your employees as you transform your organization. That requires an experienced team using proven methodologies to provide an end-to-end solution.

Kronos Workforce Dimensions™

- Dimensions-certified consultants
- Paragon Methodology
- Dell Boomi and Cloud Integration Platform integration experts

Kronos Workforce Central™

- Kronos Cloud or WFC on premise
- Proven waterfall methodology approach
- WIM and SQL integration experts

SAP Time Management by Kronos

- Dimensions and Success Factors-certified consultants
- Paragon Methodology
- CPI integration experts

EPI-USE by the Numbers

- Headquarters:** Pretoria, South Africa

I couldn't have asked for a better partner on this project. The EPI-USE team was so knowledgeable and experienced with solutions that you (the EPI-USE team) made implementation a breeze.

– Client Project Stakeholder

Kronos Upgrades

If you are currently on an outdated version of Kronos or moving from Workforce Central™ to Kronos' new flagship product, Dimensions, EPI-USE will work with you to make the transition as easy as possible for your employees.

- Gap analysis to develop a roadmap to get to future state
- Identify areas for increased value delivery
- Upgrade to most current version of Workforce Central™, either on-premise or Cloud
- Migrate from Workforce Central™ to Workforce Dimensions™

Integrate ERP, HR and Payroll with Kronos

Time and Attendance can touch every aspect of your company. In most cases, your company already has an established ERP, HR and Payroll structure, and it's likely your ERP vendor is already one of our partners! Integrations between on- premise or Cloud applications can be done in a variety of ways from writing interfaces to developing re-usable APIs. Our consultants are experienced using:

- CPI Integration Platform (CPI)
- Dell Boomi
- SQL
- WIM

To integrate between Kronos products and HR/Payroll/ Finance applications including:

- Infor™
- SAP®
- S/4HANA®
- Oracle®
- Workday®

Kronos Advisory Services

Over the years, we have found that sometimes the best value can be realized in taking a step back and evaluating an organization's current state. Our advisory services team works with you to identify gaps and develop a strategic approach to build a better labor management platform that merges Human Capital Management practices with software application utilization.

- Our Gap Analysis and Solution Recommendation services help identify suboptimal processes and functionality gaps and develop a roadmap to optimize areas in need of improvement. The improvements could be software or process-related; our 3 decades of experience gives us the ability to examine your organizational processes holistically and make recommendations.
- Change Management and User Adoption consultants work with your end users to identify and mitigate roadblocks to user adoption and satisfaction.
- Staff Augmentation can provide a bank of hours, ongoing support, or additional resources for your project.
- Experienced Project, Program, and Engagement Management services provide seasoned expertise and act as trusted advisors to ensure your goals are met and your project is a success.

Your team integrated so successfully with ours that it was hard to know who was a consultant and who was an employee.
